### Orion Engineered Carbons expands its product portfolio with **ACETYLENE BLACK**

Orion, a valued partner of Safic-Alcan, expanded its portfolio of Carbon Black with ACETYLENE BLACK. ACETYLENE BLACK is produced by the French company SN2A and this company recently became part of Orion Engineered Carbons. Today they are known as Orion Engineered Carbons France SAS. This acquisition enlarges Orion's product portfolio and expertise to better meet the needs of their customers.

ACETYLENE BLACK offers unique properties like ultra high purity, a high degree of graphitization and high electrical conductivity.

Its applications are numerous, for instance wires & cables, engineered plastics, antistatic & conductive coatings, conductive & moisture sensitive adhesives & sealants.

Please contact our sales team for further product information:
